PROFESSIONAL PROFILE

Software Engineering student in my 7th semester at UPC (Lima, Peru), passionate about designing and building scalable technological solutions. Hands-on experience leading development teams, implementing backend architectures with Java/Spring Boot and DDD, and developing web platforms with Angular and TypeScript. Fast learner, adaptable to demanding environments, and committed to delivering real value through technology.

EDUCATION

Universidad Peruana de Ciencias Aplicadas (UPC) — Software Engineering *Aug 2023 – present*
7th Semester
Relevant courses: Software Architecture Fundamentals, Algorithmic Complexity, Software Engineering Experiment Design, Statistics

PROJECTS

ChambaYA — Backend for Temporary Jobs App *Mar 2026 – Jul 2026*
github.com/app-movil-3821/Backend-ChambaYa

- Designed and implemented a modular monolith with DDD — 6 decoupled bounded contexts (IAM, Jobs, Enrollment, Payments, Reputation, Communication). C4 and UML diagrams for modeling.
- REST APIs documented with Swagger. MongoDB Atlas database. Continuous deployment on Railway. Stack: Java + Spring Boot + DDD.
- Led a 5-person team as Scrum Master. Version control with Git/GitHub and code reviews via pull requests.

Foundly — Project Management Web Platform *Aug 2025 – Dec 2025*
github.com/Launchpad-PE/Foundly-Frontend

- Clean Architecture + DDD on the frontend. Strict TypeScript, testing with Vitest + JSDOM. Team version control with Git/GitHub.
- Component integration with REST APIs. Entity modeling and business flows with UML diagrams.

NursePulse — DevOps / Cloud Project *Oct 2026*
github.com/JorgeFTS/nursepulse-azure

- Deployed Spring Boot backend on Render with CI/CD via GitHub Actions. Frontend on Vercel. Environment variables, secrets, and automated pipeline configuration.
- MySQL database managed on Aiven. Uptime monitoring with UptimeRobot.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, Kotlin, SQL
Frameworks: Spring Boot, Angular, FastAPI, Jetpack Compose
Architecture: REST APIs, DDD, Clean Architecture, C4/UML diagrams
Cloud/DevOps: Render, Vercel, GitHub Actions, CI/CD
Databases: MongoDB, MySQL, Aiven
Other: Git, Jira, Scrum, Swagger, Postman

CERTIFICATIONS

EY Technology Risk Virtual Job Simulation — Forage *Sep 2026*
Generative AI Leader — Google Cloud *Sep 2026*
Generative AI Fundamentals — IBM / Coursera *May 2026*
Build your first AI companion — Lab — Google Developer Experts *May 2026*
Prompt Design in Vertex AI — Google Cloud (Skill Badge) *Mar 2026*
Python for Everybody — University of Michigan / Coursera *Sep 2025*
Scrum Fundamentals Certified (SFC) — SCRUMstudy *May 2024*
